

First Announcement and Call for Papers**2009 INTERNATIONAL SYMPOSIUM
FOR PATHOPHYSIOLOGY TEACHING****(ISPT 2009)*****--Teaching of Pathophysiology and Clinical Physiology in the 21st Century*****November 20 to November 23, 2009, Shanghai**

With increasing study in disease mechanisms, pathophysiology is evolving rapidly and playing an ever more important role in educating medical students. It remains a challenge that how to innovate current teaching patterns and methods and to update teaching contents, which can be better based for clinical practice. To exchange worldwide experience in pathophysiology teaching reform, and to promote teaching quality, the International Society for Pathophysiology and Chinese Association of Pathophysiology will jointly hold the 2009 International Symposium for Teaching of Pathophysiology. The theme of the symposium is “Teaching of Pathophysiology and Clinical Physiology in the 21st Century”.

The symposium will be chaired by Han Qide, president of International Society for Pathophysiology and president of Chinese Association of Pathophysiology, and hosted by the Second Military Medical University in Shanghai. There will be reports from leading pathophysiologists, clinical physiologists and relevant educators in basic and clinical medicine, as well as various forms of exchange of teaching experience. As organizers, we warmly welcome international pathophysiology, pathologists, physiologists, educators, teaching managers and experts and scholars from other relevant fields, with or without papers, to meet in Shanghai, the biggest metropolis in China.
