Montreal, June 9, 2010

Dear members of ISP International Committee,

This is an update of the ISP 2010 Congress.

With the approval of Dr Qide Han, President of the International Society of Pathophysiology, I would like to confirm with you the new dates the ISP will be held in Montreal: September 22 to September 25, 2010. Please reserve these dates in your agenda.

We have postponed the dates of the Congress to accommodate the 14th SHR Symposium. I would like to confirm with you that the Society for SHR is supporting my presidency and the holding of the 14th International SHR Symposium in Montreal, in conjunction with ISP Congress. Because this SHR Symposium is a satellite of the Vancouver 2010 Hypertension Congress, I am convinced that the ISP will benefit from its diffusion in terms of visibility and attendances. We hope to increase the attendance at the ISP to 1 500.

With my best personal regards,

Pavel Hamet
